Introduction

The goal is to create a consolidated document displaying three charts generated using Python, R, and Power BI. The chart types are scatter plots, bubble charts, and density maps.

I have used three datasets related to life expectancy, birth rates, and television sizes over time. The television size file was originally a .txt file, but I converted it to a .a.csv file for easy parsing and loading.

Scatter Plot – Python

Scatter Plot – R

Scatter Plot – Power BI

Life Expectancy vs Birth Rate, 2008

Bubble Chart – Python

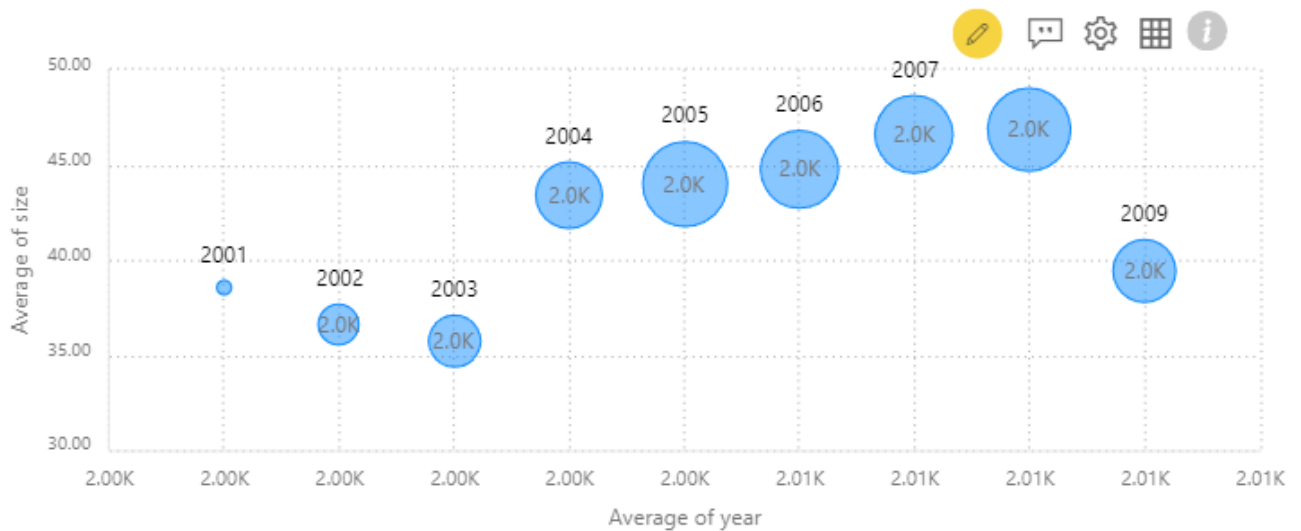

Bubble Chart – R

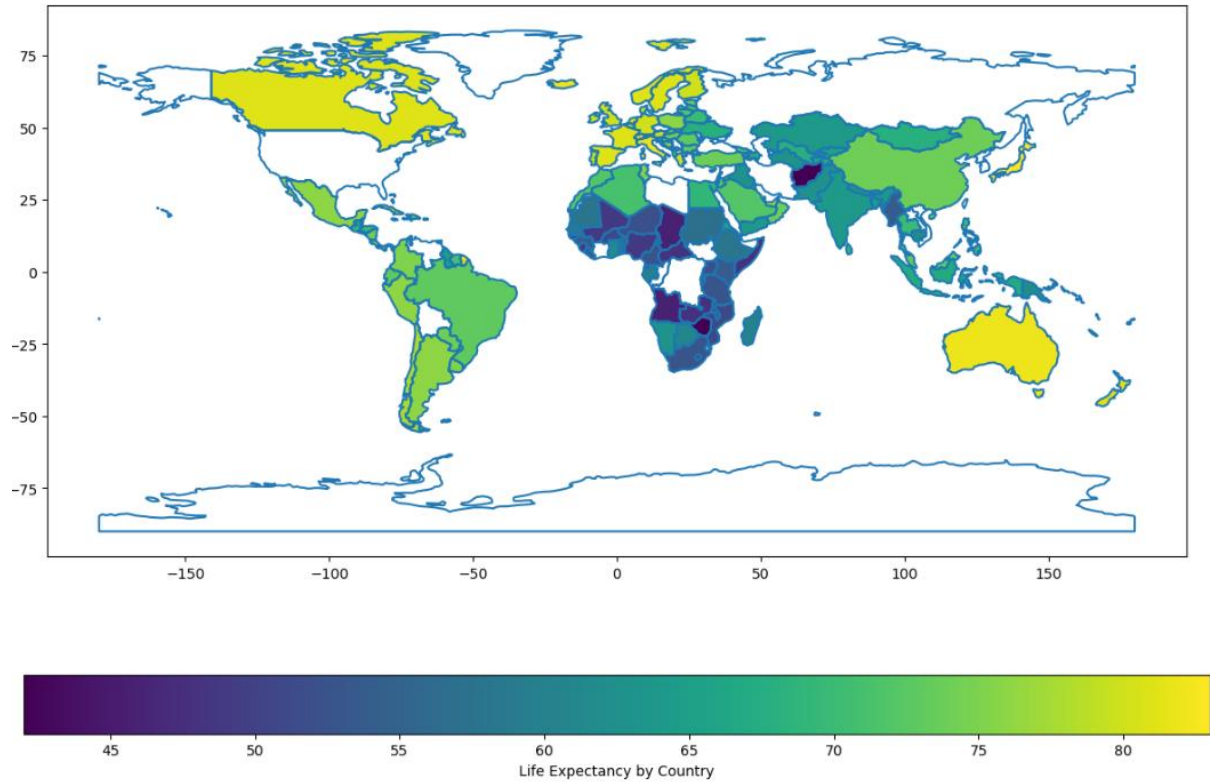

Bubble Chart – Power BI

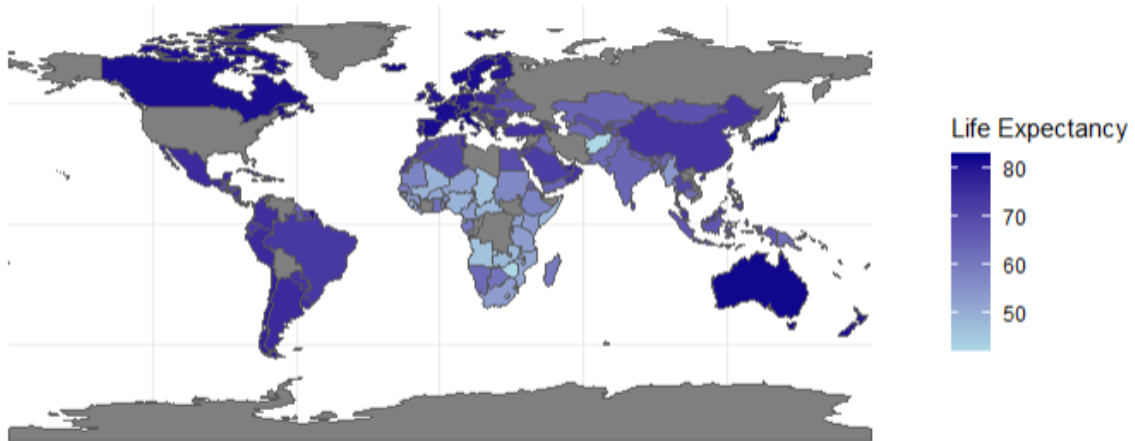

Average of year, Average of size and Count of size by year

Density Map – Python

Density Map – R

Density Map – Power BI

Country and Life Expectancy
